Mind the
gap!

Gain valuable knowledge and insight to
bridge the gap on societal challenges in:

Entrepreneurship
Sustainability
Climate Change

with our **Changemaker** programme.

► Architecture, Wood and Civil Engineering

Bring your ideas to light!

Join a community of sharing and learning.

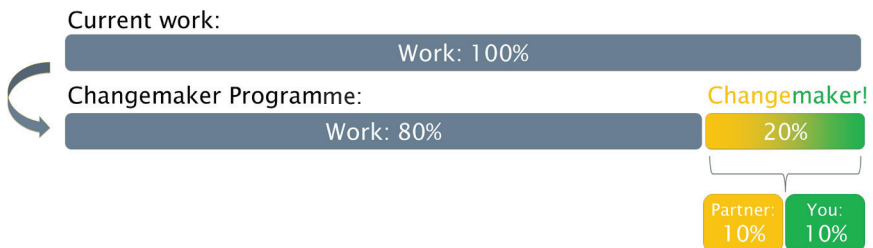

Our 6-month Changemaker programme dedicated to life-long learning invites:

- Students from architecture, wood and civil engineering
- Alumni and colleagues from construction and the wood & forest industry
- Scientific assistants & collaborators

to get involved, share and develop new business ideas and evaluate their economic, social and ecological impact. Bachelor or master students wanting to develop a business idea as part of their thesis are kindly invited to join!

Upon acceptance into the programme, a structured work plan and coaching sessions are offered to test the potential of your idea toward maturity. The programme will end with a 5-min pitch. Depending on the maturity of your idea or project, an application for a be-advanced product market fit challenge and/or a research funding proposal will be prepared for final submission.

Good things take time and Changemaker is no different: 20% of your work-week should be dedicated to exploring your business idea. Half of that is covered for you financially!

Scan the QR code on the front to sign up, share your vision and get involved!
